MEETING SUMMARY:

NEII requested this closed meeting with CPSC staff at the Manufacturing Facility for Montgomery-Kone in Moline, IL. At this meeting, ADL tested a laboratory escalator. The testing was similar to what has already been done as part of the step/skirt entrapment study that was concluded in September of this year. The information that ADL will provide as a result of the testing is crucial to determine the progress to date in determining if performance standards can be developed to address the step-skirt entrapment hazard.
